

## Revue des Inventions horlogères

### Horological Patent Alerting Bulletin

A **unique source** of patents on horology!

Every month, the RIH publishes a summarized description and the corresponding original full-text document of new patents relevant to **mechanical watches**, **electronic watches** as well as related domains such as **watch exteriors** and electronic components for watches.

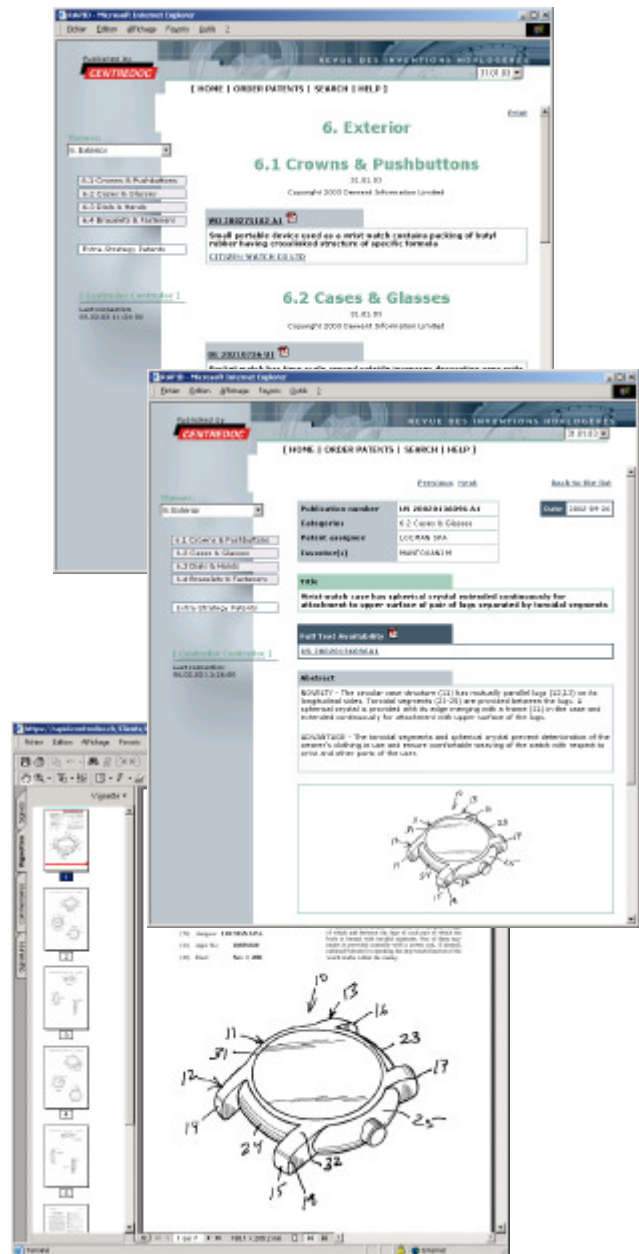

The RIH is a technology monitoring publication. It allows to identify patents of competitors as well as the latest technological developments in the field of horology.

The *Revue des Inventions Horlogères* and its collections of horological patents constitute an unique source of information. Upon request, we perform highly specialized and in-depth searches such as **state-of-the-art**, **novelty** or **freedom-to-operate**.

Countries Covered :

- ▶ Germany
- ▶ United States
- ▶ France
- ▶ Great Britain
- ▶ Japan
- ▶ Switzerland
- ▶ EP (European Patent)
- ▶ PCT (international)
